

coatings innovating for walls and ceilings

clipso building<sup>®</sup>

# Why choose Clipso ?

**Ideal for renovation and decoration purposes, CLIPSO® is a stretched ceiling designed to provide you with high-level solutions, both as regards aesthetic impact and maximum comfort. With CLIPSO®, redoing your ceiling becomes simple, rapid and unproblematical.**

**CLIPSO® is quite simply innovative !**

The CLIPSO® ceiling is a real revolution, a state-of-the-art product. Its conception and installation are completely revolutionary, and CLIPSO® offers an unsurpassed level of resistance and unparalleled quality.

- Up to 5.10m wide, with no seams or joins.
- Rapid installation, with no odour or waste.
- Installation takes place at normal temperature, with no need to move the furniture.
- The CLIPSO® covering can adapt to all forms and dimensions.
- The CLIPSO® ceiling provides improved sound-proofing.
- The covering is washable, and can be painted.
- The CLIPSO® ceiling is PVC-free, resistant, M1 category and guaranteed for 10 years.
- Rapid, simplified measurements are made, so you have an immediate quotation.

- The installation takes place all in one go, and causes no inconvenience.
- There's no need to move your plants and furniture and have your home in a complete mess for a few days.
- The adjustment system guarantees perfect uniformity and even stretch..
- The covering's state-of-the-art composition is ideal for the installation of spotlights, lights, and all types of decorative or technical items.
- The covering is waterproof and chloride-resistant. It is particularly suitable for bathrooms, swimming pools and healthspas.
- CLIPSO® is the ideal solution both for renovation purposes and for new constructions; it adapts to all styles and all situations.

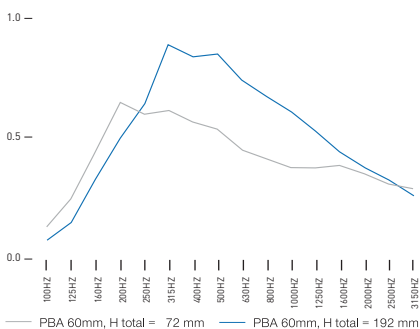

## Noise absorber, soundproof Clipso Design

## Translucent

Listen, it couldn't be better! In our busy modern world, one of the great luxuries whether at home or at work is being free from noise. After several years of intense research, CLIPSO® has developed CLIPSO ACOUSTIQUE®. The 250 000 micro-perforations per m<sup>2</sup> in the CLIPSO ACOUSTIQUE® covering plus a specifically adapted sound absorber (glass wool, rock wool...) ensure that up to 90% of the surrounding noise is eliminated (conversation, music...). When comfort and aesthetics combine their talents...

CLIPSO® incorporates leading-edge technology and digital printing (in millions of colours), which allows you to decorate walls and ceilings in new and renovated buildings with images from the CLIPSO DESIGN® collection or with any other image of your choice.

All the motifs are printed with our translucent 705 Back Light equipment, which allows 53% light transmission!

## Design Collection

CLIPSO DESIGN® will surprise you with its fabulous collections of wall decors created by talented designers and photographers. If you're an artist at heart, just contact us and we will fulfil whatever your wildest dreams can imagine.

## Print Collection

Stand out from the others! At railway stations and airports, at fairs and exhibitions, on your stands, on walls and on ceilings, everywhere CLIPSO PRINT® is a dynamic and efficient communications medium.

## Building Collection

CLIPSO BUILDING® meets all the challenges in the most unexpected construction or renovation situations, even in damp environments in collective buildings or in private homes.
